

MasterView Profile

200 x 50mm mesh size with profiled beams for rigidity.
Horizontal wires 6mm, vertical wires 5mm.

MasterView Profile is designed to provide a robust, good quality, secure solution at a competitive price. The 3 metre wide panels facilitate a faster installation and an 18% reduction in the number of posts, volume of concrete and excavation when compared with 2.5 metre wide panels.

MasterView Mesh Fencing Systems

MasterView is a range of robust, attractive, easy to install mesh fencing systems with the strongest posts of any comparable system. MasterView provides high-security solutions and maximum anti-corrosion protection - all backed by an expert customer service team.

These MasterView systems are suitable for many locations including schools, industrial and commercial sites and parks, particularly where good visibility through the fence is required. Installation is straightforward and quick, and the finished installation is as secure as it is aesthetically pleasing.

Features and Benefits

Features	Benefits
■ Posts are 60 x 60 x 3mm SHS	■ MasterView posts are the strongest posts of any comparable system
■ Posts are pre-drilled for standard stepping	■ Pre-drilled holes make it easy to step panels on sloping ground
■ Self-tapping fixing	■ No threaded inserts in posts which can spin making installation difficult
■ Magnetic fixing tool	■ Makes installation even easier
■ Wires protrude above top horizontal wire (Profile and Twin)	■ Provides additional security Panel may be inverted if not required
■ Unique MasterFix fastenings	■ Anti-vandal and tamper resistant, with nothing protruding from the back of the posts
■ A range of MasterView systems available	■ The design of the mesh panels means there is a MasterView solution for all fencing requirements
■ MasterView is manufactured in the UK	■ Extensive stocks are available for immediate despatch on Peart Fencing transport with crane offloading
